Dear **Mr Andre Steyn**

Re: **USE OF FUEL EFFECT IN VOLVO DIESEL ENGINES INSTALLED IN VOLVO CONSTRUCTION EQUIPMENT**

Babcock Equipment cannot approve or disapprove any after market product not marketed by Babcock.

Diesel fuel that has been enhanced through the controlled addition of fuel effect falls into this after market category.

It is therefore at the sole discretion of the end user to decide on the use of fuel effect enhanced fuel.

The warranty given by Babcock on all Volvo Diesel engines fitted to the equipment that we market will not be negated by the use of this product. However, any fuel related engine failure or deterioration in performance caused by the product or its incorrect application will be for the clients account.

Yours sincerely,

George De Bruyn

TECHNICAL DIRECTOR
