

iCustodian™ Anti-siphon devices

Technical data:

Description:

iCerMax™ iCustodian Anti-Siphon Devices .
 Patent ZA 2011-6647 & ZA 2010/1363-PCT2008/4142

We eliminate normal day-to-day diesel theft by fitting, logical and field-tested equipment to reduce fuel theft .We have developed a range of products that have no equivalent in the market place .

We address the whole fuel system from Cap, pick-up, Sump plug & fuel lines .

Manufacture all makes of trucks -large or small , bakkies , yellow goods ,construction equipment, tractors ,generators, train's, Wiggins & fuel main bulk tanks – in short, anything that uses fuel

We custom manufacture to your equipment's requirements, based on various criteria, years of experience and various attach /fitment methods .

With the iCustodian it is totally impossible to access the fuel without physically attacking the robust device itself ,thanks to our patented baffle plate and 2-6 mm hole size ,stainless steel wire mess inserts to prevent access to fuel .Excellent flow rates .

iCUSTODIAN

PATENTS:
 ZA2011-6647
 ZA2010-1363-PCT2008/4142

cus-to-di-an [kuh-stoh-dee-uhn]
 "...who has Custody. A Keeper.
 A Guardian."

2-6mm Port Holes

"SNAP-OFF" Bolts

MESH Basket Compliments High Flow rate

DOUBLE BAFFLE Unaligned Plating Structure

Short Length to STOP Submerging

Buying inferior devices or simply on price ,is most costly ,as the fuel is not protected from theft .The device has to protect access to fuel and ensure longevity

Patented : Baffle plate ,side fuelling ,
 2-6 mm Holes ,Stainless steel wire Mesh
